

# CHARTER OF COMMITMENT

## Description of the process

The "Local Product" charter is a network of actors positioned in an approach to promote and develop the production and consumption of products grown and processed in Bonifacio. The approach is intended to be eco-responsible and collaborative.

This network, supported by the ADEME and at the initiative of the commune of Bonifacio and its Municipal Tourist Office, brings together restaurateurs, hotel owners, producers, craftsmen, grocers, and fishermen who have registered for the initiative. A recognition logo has been created to allow the general public to discover the territory's approach and to find the network's committed members.

## Our commitments

1

### Transparence

Make the following criteria visible to customers on the products offered for consumption:

Bonifacian origin, Corsican origin, type of agriculture or fishing method, presence of labels, seasonality, and the list of producers/craftsmen/fishermen suppliers.

2

### Responsability

Aim to offer and regularly increase the number of products from Bonifacian agriculture - organic, sustainable, permaculture, biodynamic - and from local sustainable fishing.

3

### Collaboration

Investing in the success of the project through one's presence and/or contribution: opinions, ideas, resources and producing an annual report on the progress of production and/or consumption of Bonifacian products in one's establishment.
